

AmosConnect

Integrated messaging service

AmosConnect is a secure, hassle-free email service that seamlessly integrates your communications into one platform, both at sea and on land; removing the need to maintain an in-house communications system.

Your messages never leave the Inmarsat network, ensuring your communications are more secure, and your system is protected from viruses and spam through rigorous filtering of unwanted messages.

Why choose AmosConnect?

- > No in-house communication system maintenance
- > Fully managed fault resolution
- > Enhanced reliability and security
- > Removes concerns about on-board users receiving unwanted messages
- > Compressed, encoded communications are more secure than SMTP email

- > Service features designed to significantly reduce your operating costs
- > Online and offline system notifications – over Inmarsat-C and/or to your office via email

AmosConnect is compatible with Fleet Xpress, Fleet One, FleetBroadband, IsatPhone, and other IP based and E&E satellite terminals.

**More than 1 billion
emails sent via
AmosConnect**

Basic version (free)

Easy download and activation

Automatic message compression – Averages 50% for all file types, with up to 85% for text and database files, resulting in significant cost savings

Coverage – works in all ocean regions

Security features – automatic virus scanning. Shore to ship messages only

Full version

For more complex messaging, you can easily upgrade to any, or all of the following capabilities:

AmosConnect Office – Installation at your onshore office gives you a direct TCP/IP connection between your office and the AmosConnect Hub, enabling you to:

- Evolved security
- Configure email boxes with specific size for different personnel

Third party software application – AmosConnect Office can act as middleware for many third-party software applications enabling you to:

- Automate data collection from on board, to any onshore email address
- Automatically update on board application data, such as virus scanning, digital charts or database replication
- Communicate with GPRS, PSTN, or ISDN when ships are in range, or in port

Additional services

AmosConnect Online

AmosConnect Online allows you to manage your ships' mailboxes. Basic users receive an account and password for each ship upon activation; each ship must be managed separately. Full version users receive an account for managing all ships under their account.

The following AmosConnect Online features are currently available to help you control and filter messages:

- Black / white lists – manage message sender and receivers to your vessel, and maximum message size
- Message management – redirect messages, copy queued messages, set auto delete time limits, view details of messages (subject, size and originator) waiting to be collected/deleted and view call/message history
- Connection log – view when your ships last logged onto the AmosConnect hub
- Force PDN, NDN – force Delivery Notifications on specific originating email addresses

Crew Communications

Provide your crew members with access to voice calls, email, and SMS/text messaging via a single, convenient Inmarsat ChatCard. This service is prepaid, and crew are charged only for messages they send (received messages are free of charge).

Worldwide Support

24/7 Global Customer Support. You can contact our service professionals any time for help on technical or billing issues.
