

## Final reminder: MPDS, Fleet 33 and Fleet 55 services - closure dates

02 March 2018

This notification provides a final reminder of the imminent global closure of the Fleet 33 and Fleet 55 services, and the regional closure of the Mobile Packet Data Service (MPDS) in the Inmarsat-3 (I-3) Atlantic Ocean Region West (AORW).

MPDS will remain available globally until 31 March 2018, at which point we will commence the service closure in the AORW region. Following this, MPDS will continue to be supported on Fleet 77 (and Swift 64), in all other I-3 ocean regions, on reasonable effort basis, and will be closed in stages as shown in the EOL (End-of-Life) schedule below. No MPDS will be available beyond 2018.

The EOL date for the Fleet 77 service remains unchanged as 01 December 2020 as per our last communication in December 2017.

The summary EOL schedule is as outlined below:

Service	EOL Date
MPDS	<ul style="list-style-type: none"><li>- Atlantic Ocean Region West (AORW): 31 March 2018</li><li>- Atlantic Ocean Region East (AORE): End Q2 2018</li><li>- Pacific Ocean Region (POR): End Q3 2018</li><li>- Indian Ocean Region (IOR): End Q4 2018</li></ul>
Fleet 33 & 55	31 March 2018
Fleet 77	01 December 2020

### What happens to the service fees & charges?

Customers should also be aware that normal fees & charges continue to apply while any terminal is active on the network and the respective service is in use.

### What service migration options are available?

Customers are encouraged to migrate to one of the following Inmarsat services which offer simultaneous voice and IP data:

Fleet One

FleetBroadband 250 or 500

Fleet Xpress

COMSAT will support customers wishing to migrate to one of these recommended services.
